Excellent.Von Das mag ichWer intensiv, kurz und bndig ber die Geschichte und die Verwendung der F-104
Starfighter und der Sicht von Piloten ber diesen "Vogel" informiert werden will liegt hier absolut richtig. Das Buch

beinhaltet mehrere schwarz - wei Fotos und wird mit hervorragenden Seitensicht-Profilzeichnungen abgerundet. Bitte beachten, dass dieses Buch in Englisch geschrieben ist, aber in einem leichten, verständlichen Englisch. Sehr, sehr empfehlenswert! 1 von 3 Kunden fanden die folgende Rezension hilfreich. Sehr gutes Buch für Detailwissen Von E.J. Volle fünf Punkte für ein Buch das leider in englischer Sprache ist welches aber sehr gute Details und Hintergrundwissen vermittelt und die sehr genauen und Seitenrisse sind auch für Modellbauer interessant und anregend, das Geld hat sich gelohnt, nicht gerade günstig, aber Verarbeitung und Inhalt top, also Qualitätsware, da kann man schon mal einen Euro mehr ausgeben wenn solch ein gut verarbeitetes Buch auch ein Leben lang Freude bereitet.

KurzbeschreibungThe Starfighter was once described as a delight to fly, but one mistake and it will kill you. It is one of the world's fastest fighters with a top speed of Mach 2.2 and a service ceiling of 58,000 feet. First delivered to the USAF in 1958 it was also sold to the German, Greek, Italian, Turkish and Italian Air Forces. It could carry a variety of air to air, and air to surface missiles and was powered by a single General Electric J79 turbojet that developed 17,900lbs of thrust with afterburner. The Italian Air Force continued to fly it into the 21st Century. This book contains the world famous color profiles created by Dave Windle of the type in different operational modes, configurations and color schemes. Martin Bowman has written detailed descriptions and photographs to create the perfect enthusiasts' reference.
