Von Dennis Dalton : Mahatma Gandhi: Nonviolent Power in Action before purchasing it in order to gage whether or not it would be worth my time, and all praised Mahatma Gandhi: Nonviolent Power in Action:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. The POWER of the Truth ForceVon Christopher J. CoreyI don't care to duplicate the academic praise seen in the above reviews. But I can tell you simply that Dennis Dalton was my professor in a class on Non-Violence at Columbia Univ. and it changed my life. At a period of time when I was an atheist, believing that all religion was just a set of rules to control people, D. Dalton demonstrated through the example of Ghandi that the Love and Truth force can be a

powerful vehicle for change. This completely changed my view point from victim to activist. One could actually have spirituality from within, instead of imposed upon him or her from without. A tool, not a punishment. The 'truth' one has seems to be irrelevant; it is one's passion and belief and willingness to stand behind that Truth that triumphs. If it is True in the archetypal sense, others will join (not follow) you. And by direct action at the heart level, you can touch and change nations. This is not about passive resistance; this is about direct non-violent confrontation. It is about appealing to the best, the highest nature, of that which you confront. He showed me that one can change the world with one's heart; that truth can win. And now I just wait for Dennis to write the definitive book on Emma Goldman... Truly a great teacher and initiator of the inner spark of one's own truth force. And with Gandhi as his guiding archetype, this book should be on the reading list of every activist.

Kurzbeschreibung First published in 1993, Dennis Dalton's iconoclastic account of Gandhi's political and intellectual development gained prominence for its balance and extensive research, as well as its portrayal of Gandhi as a deeply human and complex force. Focusing on the leader's two signal triumphs: the civil disobedience movement (or salt satyagraha) of 1930 and the Calcutta fast of 1947, Dalton makes clear that Gandhi's lifelong career in national politics gave him the opportunity to develop and refine his ideals. He controversially concludes with a comparison of Gandhi's methods and the strategies of Martin Luther King Jr. and Malcolm X, proposing a fascinating juxtaposition that not only enriches the biography of all three figures but also proves Gandhi's relevance to the study of race and political leadership in America. A new afterword situates Gandhi within the "clash of civilizations" debate, identifying the implications for continuing nonviolent protests. Dalton also conducts an extensive overview of Gandhian studies and includes a detailed chronology of events in Gandhi's life and leadership.
