Von Erez Ben-Ari, Ran Dolev : Microsoft Forefront UAG 2010 Administrator's Handbook before purchasing it in order to gage whether or not it would be worth my time, and all praised Microsoft Forefront UAG 2010 Administrator's Handbook:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Auf jeden Fall ein Administrator's HandbookVon Thomas StensitzkiKurz zusammengefasst: Erez Ben-Ari wei wovon er spricht.Das Buch its sowohl fr den Administrator whrend des Setups als auch whrend des spteren Betriebs einer UAG Umgebung zu empfehlen. Sehr gut sind die Tipps Tricks, die auf Stolpersteine hinweisen, die bei Nichtbeachtung schlicht unumkehrbar sind. Alleine aus diesem Grund lohnt sich das Buch.

KurzbeschreibungThis book is a hands-on guide, describing concepts, ideas and terminology related to UAG and related technologies. The book starts with a discussion of terms that UAG technology is based on, and proceeds with

step-by-step guidance for performing the various tasks related to UAG's core features. Each topic is preceded by a discussion of considerations that the administrator and the organization needs to go through to prepare for the task at hand, and includes plenty of screenshots illustrating what the administrator should expect to see on-screen, with real-life examples of configuration options. If you are a Networking or Security engineer who intends to integrate UAG into the organization network, then this book is for you. You need no experience with UAG or its predecessors, though basic understanding of Networking and Windows Server management and engineering is required. Experience with security systems like Firewalls would also help you to better understand some of the topics covered by this book. This a comprehensive step-by-step tutorial packed with screenshots and examples for easy and quick pickup.

ber den Autor und weitere MitwirkendeErez Ben-Ari Erez Ben-Ari is a long time Technologist and Journalist, and has worked in the Information Technology industry since 1991. During his career, Erez has provided security consulting and analysis services for some of the leading companies and organizations in the world, including Intel, IBM, Amdocs, CA, HP, NDS, Sun Microsystems, Oracle and many others. His work has gained national fame in Israel, and he has been featured in the press regularly. Having joined Microsoft in 2000, Erez has worked for many years in Microsoft's Development Center in Israel, where Microsoft's ISA Server was developed. Being a part of the release of ISA 2000, ISA 2004 and ISA 2006, Erez held several roles, including Operation engineering, Software testing, Web-based software design and testing automation design. Now living in the United States, Erez still works for Microsoft, currently as a senior support engineer for UAG. As a journalist, Erez has been writing since 1995, and has written for some of the leading publications in Israel and in the United States. He has been a member of the Israeli National Press Office since 2001, and his personal blogs are read by thousands of visitors per month. Erez has also written, produced and edited content for TV and Radio, working for Israel's TV Channel 2, Ana-Ney communications, Radio Haifa and other venues.

Ran Dolev Ran Dolev is a veteran of the network security and SSL VPN industries. Ran has worked with the UAG product for more than twelve years, since the product's inception at the start-up company Whale Communications in 1998, where Ran was the first full-time developer of the product. After several years Ran moved to a services position as the EMEA Professional Services Manager for the team. In this role Ran has designed and delivered numerous IAG and UAG training sessions in North America, Europe, Middle East, Asia and Australia, to customers, partners and Microsoft employees. Ran also provides consulting and deployment services for many of Microsoft's enterprise UAG customers
