Kurzbeschreibung This volume in the Praeger Security International (PSI) series Classics of the Counterinsurgency Era reveals how French officers who served in Indochina, like the author, Roger Trinquier, fought fierce rear-guard actions against ideologically motivated insurgents in the 1940s and 1950s to a far greater extent than their American counterparts later faced in Vietnam. The lack of coherent strategic direction from Paris in the chaotic years of the Fourth Republic left the military with the task of making political decisions in the field. With the original introduction by Bernard B. Fall and a new foreword prepared by Eliot A. Cohen.

Synopsis This work outlines lessons from the past that are relevant to today's conflicts and focuses on French military actions against counterinsurgents during the 1940's and 50's. This revised and updated edition is part of the highly acclaimed "Praeger Security International Classics of Counterinsurgency" series, and now features both the original introduction by Bernard Fall, and a new foreword by Eliot Cohen. "Modern Warfare" reveals how the French military fought fierce rearguard actions against ideologically motivated insurgents in Indochina during the 1940's and 1950's, to much greater extent than the Americans ever did in the later Vietnam conflict. In focusing on this lesser-known phase in the build up to American involvement in Vietnam, it outlines important lessons in the understanding of counterinsurgency movements that are relevant to today's conflicts.
