**Von Antano Solar John : MODx Web Development** before purchasing it in order to gage whether or not it would be worth my time, and all praised MODx Web Development:

KundenrezensionenHilfreichste Kundenrezensionen2 von 2 Kunden fanden die folgende Rezension hilfreich. For Modx Developers (Starters and Experienced)Von Sue Klee"MODX Web Development" is mainly for developers that construct websites. You should be computer savy and be able to handle (X)HTML/CSS and to some extend PHP. It does not contain sufficient documentation for MODX editors (Redakteure).This book was long overdue and helped me understand MODX even better. I have had no trouble using the instuctions with the actual version of MODX - MODX Evolution.As a freelancer, you may find some more arguments to convince your customers to switch to MODX.

Kurzbeschreibung This book is an example-driven tutorial, which will take you from the installation of MODx through to configuration, customization, and deployment. Step-by-step instructions will enable you to build a fully-functional, feature-rich website quickly and without any programming language. This book is ideal for those who want to learn to use MODx. Both beginner and experienced web developers will benefit from this comprehensive guide to MODx. No knowledge of PHP programming or any templating language is needed, but the more advanced chapters towards the end of the book will allow more confident developers to extend their applications even further by creating their own snippets.

ber den Autor und weitere Mitwirkende Antano Solar is a techie to the core-a tech evangelist who is passionate about using technology to revolutionize the learning experience! Antano has contributed to the open source community in terms of documentation, code, and support, with a variety of platforms based on languages such as PHP, Perl, Lisp, Python, and Ruby. He loves to share his tech excitement with fellow techies and non-techies, and does so through publishing papers, books, and delivering seminars at colleges, universities such as the IIT, and corporate tech events. He has published a paper on enhancing wireless networks in an IEEE Journal. His paper on an engine helping machines understand objectives by meta-modeling, using Neurolinguistic Programming principles and Deep Structure, is considered a landmark. An avid hacker, Antano has won two Yahoo hack-day awards. He recently won the award for developing a Hybrid Search Engine from scratch in 24 hours that uses Machine Intelligence and Social Intelligence to identify, search, and present the information in the required format. Professionally, until recently, Antano was a Consultant and a Trainer providing IT solutions and sessions on VoIP, Networks and Software Platforms, and Languages. He is currently the Chief Technology Officer at NuVeda Learning. In his current role, he is responsible for the development and deployment of Learning Management Systems that are used by large MNCs globally. He also plays the role of a Chief Architect in the research and development of technologies related to the understanding and measuring of Learning. He is excited by the challenges of using complex technologies such as Artificial Intelligence and Natural Language Processing. Occasionally, when Antano needs to take a "Tech" break, he likes to train and tell stories!
